

INTERDISCIPLINARY (ID)

ID 115 - Food for Thought: What's cooking? for Apartment Dwellers

Credits: 2

How to schedule and prepare nutritious meals throughout the week with one trip to the grocery store. Students experiment with hands-on cooking in the Test Kitchen, under the guidance of Skidmore Executive Chef Jim Rose. They also study the natural history of the transformation of food, international trend of food writing, and cooking shows.

ID 141 - Mediation Training

Credits: 1

Mediation is a conflict resolution process that is used in close cooperation with the courts. Cases such as small claims court disputes and parent/teen conflicts are often referred by the courts to mediation by trained volunteers. The mediation training is a partnership with Mediation Matters, a nonprofit agency in Saratoga Springs that provides mediation services and receives its funding from the New York court system. This training will certify students as volunteers enabling them to mediate campus disputes through our own peer mediation program as well as cases referred to Mediation Matters by the courts. This is an intensive 30-hour training using film clips, role plays, readings, and discussion that focuses on building facilitation skills.

ID 151 - Scribner Colloquia

Credits: 1

A topic seminar that may emerge from a Scribner Seminar or as a novel offering (e.g., a film series). The topic(s) will be addressed from the perspective of different disciplines. The frequency with which the seminar meets will vary depending on the goals of seminar.

Prerequisites: Open only to first-year students and with permission of instructor.

Note(s): May only be taken once for credit. May not be taken concurrently with ID 171.

ID 171 - Interdisciplinary Independent Study

Credits: 1

Independent work for first-year students in collaboration with two different project leaders. The project leaders will define the nature of the interdisciplinary project and recruit first-year students for participation. The participating students will serve as apprentices to the project leaders and learn about several different approaches to investigating the particular project.

Note(s): May only be taken once for credit. May not be taken concurrently with ID 151.

ID 190 - Presenting the Brand Called Me

Credits: 1

Students will be required to present themselves in a variety of situations related to career development. Learning contexts will include formal job and information interviews, formal and short impromptu presentations, and dialogues regarding career issues. Students will have the opportunity to apply skills taught by theater instructors and business professionals. Academic and professional mentors will provide essential knowledge to students regarding the presentation of self in diverse situations. This course covers the following dimensions for studying management and business in context: II, III, IV.

Note(s): This course does not count toward the business major or minor. Not for liberal arts credit.

ID 201H - Peer Mentoring Seminar

Credits: 1

An introduction to the theory and practice of collaborative learning and mentoring as they relate to the interdisciplinary issues raised in Scribner Seminars. The course examines the role of mentors, the ethics of mentoring, and common mentoring problems. Students engage in a consideration of the readings and topics in selected Scribner Seminars, placing them in wider intellectual and pedagogical contexts, and undertake a term project on mentoring.

Note(s): Required for all students serving as Scribner Seminar mentors. May be taken up to four times for credit.

ID 202 - FYE Peer Mentoring Experience

Credits: 2

Academic credit for participation as a peer mentor in a Scribner Seminar. Peer mentors earn credits for completing the general expectations associated with the position, including: attending all seminar classes, completing all reading assignments and in-class projects, participating in class discussions (when appropriate), helping the faculty with fourth-credit hour programming, completing other duties assigned by the instructor, and mentoring first-year students. Mentoring first-year students includes supporting them as they make the academic and social transition to college, meeting students outside of class, and cultivating a robust living-learning community. Faculty may choose to require a modest writing assignment or some other project.

Corequisites: ID 201.

Note(s): Peer Mentoring Workshop is a one-credit training course to prepare students for and guide them through the mentoring experience. May be taken three times for credit. Not for liberal arts credit.

ID 210 - Introduction to GIS

Credits: 4

An introduction to the concepts and principles of Geographic Information Systems (GIS) for computerized mapping and spatial analysis in the social and natural sciences. Students will be introduced to major concepts and principles of Geographic Information Systems (GIS) for computerized mapping and spatial analysis in the social and natural sciences. Students will be introduced to major concepts in GIS, become versed in the types of problems and analyses that GIS can be used to address and perform, and create effective presentations of geospatial information. Students will define a problem in spatial analysis, obtain relevant data from online sources, and use geoprocessing operations to produce quality maps. The course is designed to enable students to be self-sufficient, project-oriented GIS users.

Prerequisites: Placement at the AQR level or completion of an FQR course or QR1.

Note(s): Fulfills QR2 requirement; fulfills Applied QR requirement

ID 221 - Multicultural Flare-Ups: Explosive Identity Conflicts in the U.S.A.

Credits: 3

A study of tensions arising from the dynamics of social identity and belonging in multicultural societies. Students combine methods from history, political science, legal studies, anthropology, sociology, and media studies to analyze incidents of serious socio-cultural conflict. The class is a discussion-based seminar with students working on a substantial field project.

Note(s): Fulfills Cultural Diversity and Social Sciences requirement.

ID 222 - Minoritized IDs in Science

Credits: 2

This course is geared toward all science majors, with the goal of highlighting the experience of individuals in minoritized groups in science and building a more inclusive community in the sciences, especially focusing on the intersection of multiple identities. Students will explore how power is distributed within the modern scientific community, how the unequal distribution of power affects participation in the sciences, and what steps those in the scientific community can take to alleviate injustices. The course will consist of discussion on readings as well as informal discussion about the students' own experiences in the sciences. A large part of the course will be a semester-long service-learning project that aims to improve the science community at Skidmore in relation to the experience of minoritized identities in the sciences.

Prerequisites: SSP 100.**Note(s):** Fulfills Bridge Experience requirement.**ID 225 - Emergency Medical Technician: Basic**

Credits: 3

An introduction to the assessment, treatment, and transport of critical and emergent patients. The Emergency Medical Technician-Basic EMT-B course follows the most current United States Department of Transportation (USDOT) National Standard Curriculum for EMT-B. Students will explore physiological and pharmacological principles as they develop the technical proficiency necessary to provide pre-hospital patient care at the level of an EMT-B.

Note(s): There is a lab fee of \$40 that will be collected by the certifying organization. There is a \$28 fee to register for the New York State certification exam. Matriculated Skidmore students have priority in registering for this class. All class participants must complete the course clinical hours requirements and also take the New York State EMT qualifying exam before the end of the semester. Non-Skidmore students must complete all course requirements and, in addition, must be affiliated with a local EMS agency and/or be willing to pay REMO certification costs separately in order to qualify for the EMS certification exam. Not for liberal arts credit.

ID 231 - Being Human in STEM

Credits: 3

An interactive course devoted to using academic inquiry and community engagement to examine how societal power structures influence science education and the practice of science. Students will ground their understanding of the STEM experience at Skidmore in national and global contexts, specifically looking at the way in which race/ethnicity, class, gender expression & identity, sexuality, (dis)ability, nationality, and religion shape our experiences in and uses of science. Students will reflect on their own experiences in STEM, read interdisciplinary peer-reviewed literature, and survey existing evidence-based inclusive practices at a range of educational institutions; Students will design their own group projects on building a more inclusive scientific community that will be presented to the community.

Prerequisites: Completion of a Scientific Inquiry through Practice course or by special permission of the instructor and SSP 100.**Note(s):** Fulfills Bridge Experience requirement.**ID 232 - Unsung Heroes**

Credits: 3

Representation in STEM - An introduction to the challenges historically faced by women and minorities in sciences and medicine and the impact/influence this historical discrimination still has today. In medieval Europe, women with knowledge about the healing properties of herbs were persecuted as witches. In colonial America, racial discrimination was used to establish the dominance of colonists of European descent. Students in this course will explore the impact of these historical events that are still evident today. Exploring the work of individuals, past and present, from underrepresented groups in various STEM disciplines, students will create blogs and podcast to highlight their contributions. Students will explore the policies of professional societies within STEM to make their field more inclusive.

Prerequisites: SSP 100 and a Scientific Inquiry course.**Note(s):** Fulfills Bridge Experience requirement.**ID 235 - Social Entrepreneurship Practicum**

Credits: 3

An introduction to the tools and methods of social entrepreneurship to creatively and effectively address social challenges. Students will work through these concepts by designing their own project. Unlike many similar courses, we will take a holistic approach to the topic of social entrepreneurship, focusing in equal parts on (a) a systems approach to social challenges, (b) the social enterprise (or project), and (c) the social entrepreneur.

Note(s): This course is a hands-on, interactive study in how enterprises come to life to solve social challenges. This course is open to students from all disciplines. However, students who have had exposure to previous business courses and/or accounting may be better prepared for some of the course content. Not for liberal arts credit.

ID 251 - Topics in Interdisciplinary Study

Credits: 1-4

Topically organized courses based on themes or problems that bring together the perspectives of multiple disciplines. The specific problems may differ from year to year. Examples include the Sophomore Transitional Program of the Skidmore Scholars in Science and Mathematics (S3M) Scholarship grant from NSF.

ID 271 - Interdisciplinary Independent Study

Credits: 3-4

Independent work for sophomores or more advanced students whose academic interests require an interdisciplinary approach beyond the academic structures available through established departmental courses. The student must have the background appropriate to the proposed study, must have completed at least one other interdisciplinary course at Skidmore, must carefully define a plan of study, and must enlist the guidance of one or more faculty, as appropriate. Proposals for ID 271 are reviewed by the chair(s) of the sponsoring faculty member's home department or interdisciplinary program; or in the case of students with an approved self-determined major, by the chair of the Self-Determined Majors Subcommittee.

ID 305 - Teaching English in China

Credits: 1

Overview of Chinese culture and effective teaching strategies in a university environment. Students learn and practice pedagogical techniques as English language teachers in China. Additional topics include travel, living situation, health and medical concerns, social and professional life.

Note(s): Enrollment is limited to seniors who have been accepted into the Teach in China program. Not for liberal arts credit.

ID 306 - Music Synthesis Techniques

Credits: 3

Various techniques are used to manipulate audio signals. Both signals that have been recorded and manipulated through filtering and compression, and those that have been created using synthesis methods will be explored. Techniques such as additive, distortion, FM, and granular together comprise what is known as Signal Processing - whether applied to audio or not. In addition, students will gain a deeper understanding of the acoustic and electrical principles involved in the creation of synthesized music. Students will also explore their understanding through the creation of a series of short, 1 minute compositions that utilize each technique. A variety of programs will be introduced, such as Audacity, Amadeus, Matlab and Max/MSP.

Prerequisites: MA 113 and AQR placement.

Note(s): Fulfills Applied QR requirement.

ID 310 - Language and Thought

Credits: 4

An interdisciplinary seminar on the interrelation between language and thought. Language and thought are intimately connected in human beings, but how exactly are they interrelated? Does the specific language you speak change how you experience the world? Do humans think and experience the world differently than other animals because of our unique linguistic abilities? Are human language abilities in fact unique in the animal kingdom? In this class, students will look to both historical and contemporary psychologists and philosophers to interrogate the nuances of the relationship between language and thought. Students will read, write, discuss, and think about how different cultures and species perceive and represent such concepts as gender, agency, time, space, number, and color.

Prerequisites: PS 202 or one Philosophy course.

Note(s): Fulfills Humanistic Inquiry requirement.

ID 314 - codED: Computer Science in the Middle School

Credits: 1

Introduces students to research-based pedagogies and instructional design for teaching computer science and digital literacy in middle school settings. Emphasizing inquiry-based learning, project-based learning, and culturally responsive teaching, the course supports students in applying their STEM content knowledge to develop, deliver, and reflect on lessons aligned with the New York State Computer Science and Digital Literacy Standards. Through a combination of curriculum development, peer feedback, and supervised teaching, students gain hands-on experience teaching computer science in a local middle school and explore how to engage learners through equitable and developmentally appropriate instructional strategies. Students will teach their computer science lessons outside of class meeting time (1 lead teaching experience, and at least two other instances for a total of 3 hours) and will work with the instructor to schedule available times.

Prerequisites: At least 2 courses in Computer Science or 1 Computer Science course and 1 Education Studies course or Instructor Permission.

Note(s): No prior teaching experience is required. Designated an Applied Civic Engagement course. Fulfills Senior Coda Experience requirement.

ID 351 - Advanced Topics in Interdisciplinary Study

Credits: 1-4

Topically organized courses based on themes or problems that bring together the perspectives of multiple disciplines. The specific themes or problems may differ from year to year. Examples include "the family" as a biological, psychological, sociological, and artistic construct; science and music; and creativity in the arts and in the sciences.

Note(s): The course with a different theme/topic may be repeated for credit.

ID 371 - Interdisciplinary Independent Study

Credits: 1-4

Independent work for juniors and seniors whose academic interests require an interdisciplinary approach beyond the academic structures available through established departmental courses. The student must have background appropriate to the proposed study, must have completed at least one other interdisciplinary course at Skidmore, must carefully define a plan of study, and must enlist the guidance of one or more faculty as appropriate. Proposals for ID 371 are reviewed by the chair(s) of the sponsoring faculty member's home department or interdisciplinary program; or in the case of students with an approved self-determined major, by the chair of the Self-Determined Majors Program.
