

PHILOSOPHY

Department Overview

The study of philosophy provides the concepts, analytical skills, and creative perception to engage deeply with the human situation. Courses in this discipline develop the habits of mind that make it possible to engage our changing world in a perceptive, intelligent, sensitive, and creative manner. The major emphasizes active engagement with philosophical texts, with the histories and traditions of human thought, and with current issues of deep significance.

Students are drawn to philosophy for a variety of reasons, and so the major aims to provide flexibility for students to pursue their own interests while also providing a solid foundation for those students who wish to continue with philosophy at the graduate level.

Chair of the Department of Philosophy: Larry Jorgensen

Course Listing

PH 101 - Introduction to Philosophy

Credits: 3

A topical and historical survey, this course will introduce the student to the discipline of philosophy. Through analysis of texts, through discussion, through participation, and through lecture, the student will gain an understanding of philosophy as both a unique discipline that attempts to answer the most profound questions about ourselves and our world and as a practice that illuminates our scientific, spiritual, social, and individual existences.

Note(s): Fulfills Humanities requirement; fulfills Humanistic Inquiry requirement.

PH 110W - Political Philosophy: An Introduction

Credits: 4

An examination of who should have power over others, of the forms that this power should take, and of the possibility of resisting and reconfiguring these power relations. Students will read and discuss classical and contemporary texts in social and political philosophy to answer these questions, and to pose related questions about justice, equality, freedom, citizenship, and social organization.

Note(s): Fulfills Expository Writing and Humanities requirements; fulfills Humanistic Inquiry and Writing requirements. This course is not an equivalent or a substitution to PL 102.

PH 112H - The Cave: Philosophy in the Shadows

Credits: 4

An introductory philosophy course that looks at the powerful metaphor of philosophy as a way of emerging from the darkness of the cave into the light of day. Students will read seminal works in philosophy, each of which has a similar argumentative structure: being released from faulty preconceptions (our lives in the cave) in order to ascend toward intellectual illumination (the emergence from the cave), only to return to our previous lives (a return to the cave, but now wiser). While each of the authors reflects on this process in some way, they are rather diverse in how they understand the nature of philosophy and how philosophy might help us to live our lives. Proposals will include ascents toward ethics, religion, science, freedom, and social justice.

Note(s): Fulfills Humanities requirement; fulfills Humanistic Inquiry requirement.

PH 203 - Ancient Greek Philosophy

Credits: 4

Ancient Greek thinkers engaged in a continuous dialogue about certain core philosophical questions, such as: Why do we philosophize? What is the nature of the cosmos, and what is the place of human beings in it? How do we know the world and ourselves? What is it to be human? What is happiness, and how can we achieve it? This course enters into that conversation through a careful reading and discussion of primary texts. Special attention will be given to Plato's and Aristotle's thought.

Note(s): Fulfills Humanities requirement; fulfills Humanistic Inquiry requirement.

PH 204 - Modern Philosophy from Descartes to Kant

Credits: 4

An introduction to major thinkers and themes of seventeenth and eighteenth-century Europe. The dynamics of the Scientific Revolution, the collection of new discoveries and inventions, and the evolving experimental methods in the early modern period led philosophers to a profound reappraisal of fundamental issues, such as the sources and limits of knowledge, the relation between mind and body, theories of human freedom and personal identity, and the apparently competing desires to explain the surrounding world in both natural and religious terms. Students will investigate how these philosophical developments led to distinctively modern ways of thinking about nature and the self. Primary documents will be read throughout.

Note(s): Fulfills Humanities requirement; fulfills Humanistic Inquiry requirement.

PH 207 - Introduction to Logic

Credits: 4

An introduction to the basic concepts and methods of modern symbolic logic, with a focus on their application to proper reasoning. Students learn how to represent sentences in logical notation, to reconstruct arguments in that notation, to assess arguments for validity and soundness, and to prove conclusions from premises using a system of natural deduction. Students also learn to recognize common argument forms and common mistakes in reasoning (fallacies), are introduced to philosophical issues related to logic, and learn how symbolic logic is the basis for the digital computer.

Note(s): Fulfills QR2 requirement; fulfills CS 106 prereq.

PH 210 - Philosophy and the Arts

Credits: 3

A philosophical study of the arts, art movements, their various histories and natures, as well as the questions they raise for the artist, the public, and, more broadly, contemporary culture. Classical as well as contemporary philosophies of art and art movements will be examined.

Note(s): Fulfills Humanities requirement; fulfills Humanistic Inquiry requirement.

PH 211 - Ethics

Credits: 3

A critical examination of the nature and principles of some of the major ethical theories proposed in the history of Western thought. The course may also include some consideration of the application of the theories studied to selected contemporary moral issues.

Note(s): Offered alternate years. Fulfills Humanities requirement; fulfills Humanistic Inquiry requirement.

PH 212 - Philosophy of Race

Credits: 4

Examination of arguments and ideas about the ontological, ethical, and political status of race. By exploring and critiquing historical and contemporary understandings of race and by practically applying these insights to the analysis of contemporary situations—personal, ethical, political and scientific—students will understand and be able to better affect the way in which race functions to shape our selves, our cultures, and our world.

Retrospective justice focuses on repairing historic wrongs, wrongs that resulted in serious and lasting harms and yet the primary actors are long dead. In this course, students will investigate the promises and limits of methods of responding to historic injustices, focusing in particular on three areas: (a) memorials, monuments, and memorial spaces; (b) truth telling and efforts at reshaping the narratives; and (c) reparations.

Could an AI system come to have rights and duties, or will AIs always just be tools? If AI systems cannot be morally or legally responsible for what they do, who should be?
